## MESSAGE FROM THE PRESIDENT

This week we are reintroducing the Polio Pig to the club. I thought it would be appropriate to provide the club with some information about the poliovirus so that we can better understand what we are fighting to achieve. Poliomyelitis (“polio”) is a highly infectious disease that most commonly affects children under the age of 5. The virus is spread person to person, typically through contaminated water. Polio can attack the nervous system, and in some instances, lead to paralysis. There is no known cure for polio other than Rotary International. While it is true we can’t actually cure Polio, we can, and we will, eradicate polio in the wild. Rotary International will continue to provide the safe and effective vaccines against polio at no charge. To date, we have been able to immunize over 2.5 billion children worldwide. In 1988, there were an estimated 350,000 cases of polio that were reported to the WHO. In 2018 there were 29 reported cases of polio. Since Rotary International began its mission in 1988 to end polio, reported polio cases have been reduced by 99.9%. However, we have not eradicated it yet and last year there were 29 too many cases of polio reported to the WHO.

Presently, there are only three countries in the world where polio occurs in the wild, Pakistan, Afghanistan and Nigeria. Why do we need to continue to fight against polio? Because unless we eradicate polio it will come back. Most people who contract polio are unaware that they have it because they only suffer from a mild fever for a few days. The WHO estimates that if we fail to reach our goal of eradication, within 10 years we could see as many as 200,000 new cases of polio each year as it will sweep through unvaccinated populations in countries that have been declared polio free. The disease is endemic in only 3 countries, but unless we reach every child with the vaccine, no child anywhere is safe.

Please make a donation this week to the Polio Pig and remember to bring a few dollars each week to help us make polio the second scourge (after smallpox) to be eradicated from Earth.
